8/21/2023 Notes on video

Using analytics to analyze data to make valuable information and make informed decisions using advanced processes.

Definition of data science: "The act of transforming raw data into information that others can act on". But "The study of data in order to make meaningful conclusions" is a close second to the description.

Q2: WHat is the difference between data and information?

C: Data is unprocessed. Information is processed.

C is true on peardeck, you went from C to C

The Data science life cycle

6 steps:

1. Question
2. Collect data
3. Wrangle Data
4. Analyze Data
5. Visualize Information
6. Communicate information
   All connected together
